

Abhishek Kolge

Experienced Full Stack Developer with a keen understanding of development principles and passion for creating robust and efficient systems

Relevant Experience

Software Developer **Unthread** Feb 2023 - Present

- Develop and maintain client-side business logic for admin panel and user facing application.
- Work closely with product manager and come up with solutions.
- Review junior developer's code and improve it for better performance and scalability.
- Improve application performance and optimisation with data caching on client-side and strong authentication.
- Create internal component library for better reusability.

Full Stack Developer **Digital Salt** Feb 2022 - 2023

- Collaborate with UX team to make developer friendly APIs.
- Implement and maintain client-side and server-side validation and error handling.
- Understand client's requirement and come up with programming solution for the same.
- Develop new features while maintaining existing one.
- Basic deployment of application on cloud platform such as AWS.

Front End Developer **AppOctet** Aug 2021 - Feb 2022

- Performed quality assurance tests on various sites to ensure cross browser compatibility and mobile responsiveness.
- Develop web UI as per Figma.
- Create reusable component in React JS.
- Come up with solutions to improve application performance in browser.

Main Projects

Unthread E-Commerce Platform

<https://staging-unthread.netlify.app/>

A global E-Commerce platform similar to Shopify primarily focused on online jewellery and fashion stores. User can register on Unthread and create a store with existing theme template.

Hedged

<https://hedged.in/>

Users who don't have enough knowledge of trading can use the Hedged app to get started with trading and analyse their portfolio while getting access to a wide range of personalised trade advice, news, observation charts, and much more.

Mahindra Lifespaces

<https://play.google.com/store/apps/details?id=com.mlife>

Mahindra Lifespaces app streamlined the process of onboarding and managing users who bought property from Mahindra. With the help of the application, customers can do documentation and payment processes in the comfort of their homes.
